

About Us

We, at Klebbe, are manufacturers of affordable, durable, and sophisticated modular furniture for residential and commercial spaces that meets our customer's distinctive requirements.

Klebbe (German: to bind something together) has been built by not-so-young entrepreneurs who have laboured extensively in the real estate and interior designing industry.

Bringing their experience to fruition, Klebbe was born to transfer the way India approaches modular furniture, by creating a niche where modern furniture meets functionality and exceptional aesthetics. Backed by a talented team of artisans working with our world-class European machinery.

We take great pride in our expertise and experience across all aspects of woodworking. In addition to our woodworking proficiency, we are affiliated with several sister companies, including Max Construction, Master Construction, and Mortar, Mortar Construction. These companies specialize in civil and turnkey projects, expanding our capabilities to provide comprehensive solutions for a wide range of furnishing needs.
